

Hello,

At Labcorp, our laboratories incorporate more than 80 years of combined experience in Diagnostic and Drug Development, giving us a level of expertise and scientific excellence that is unsurpassed in the industry. All laboratory testing is conducted by highly qualified, trained professionals with a patient-first inspired approach., leveraging scientific expertise and technology in therapeutic areas such as oncology, neurology, and women's health to enhance service and offerings. Through our unparalleled diagnostics and drug development capabilities, we provide insights and accelerate innovations that not only empower patients and providers but help medical, biotech, and pharmaceutical companies transform ideas into innovations. We believe in the power of science to change lives.

Due to a tremendous amount of growth (["Ascension Selects Labcorp to Manage Labs Across 10 States"](#)), we have an incredible amount of opportunities for **Laboratory Professionals** within our organization; **Medical Lab Scientists, Clinical Lab Scientists, and Medical Lab Technologists** as well as Leadership!

Lab Trajectories:

- **Central Laboratories:** Based in nine locations across the globe—Our Central Labs generate more clinical trial data than all other central laboratories combined and covers testing activities in immunology, special chemistry, safety testing, genomics, histology, targeted cell isolation, flow cytometry and microbiology.
- **Core and Stat Laboratories:** Offering hundreds of routine and specialty diagnostic testing including conditions such as cancer and chronic kidney disease.
- **Esoterix Laboratories:** Highly specialized endocrinology and coagulation. New and innovative techniques including paternity and family DNA, specialty coagulation, surgical pathology, kidney stone kits, pediatric rare disease and genetics, specialty endocrine, virology specialty testing, plasma screening, specialty toxicology, women's health and genetics.
- **Hospital Laboratories:** Partnerships with hospital groups like Ascension and University of Miami; Labcorp performs complex tests and procedures that help healthcare professionals detect, diagnose and treat diseases. This can include working with bacteria and other microorganisms, analysis of body fluids and chemical and hormonal contents.
- **Early Development / Preclinical testing:** With over 20 lab locations in 8 countries, Labcorp helps customers validate the safety of a drug, chemical or medical device breakthrough at its earliest stage of development. Testing spans discovery, toxicology, metabolism, pharmacology, bioanalysis, environmental testing, microbiology/sterility and biocompatibility to serve the pharmaceutical, crop protection, chemical and medical device industries.

Additionally excellent benefits:

- Many of the roles offer relocation and sign on packages!

- Multiple shifts to choose from!
- Competitive and comprehensive compensation package
- A company where team members actively support their local communities
- Tuition reimbursement programs
- Commitment to your overall career growth and development
- 401(k) with company match

Please feel free to send this communication to your network, students, or graduates. If you know someone interested in exploring opportunities, please have them reach out to me directly.

I'm also excited to share that we have had folks join our organization from you sharing/spreading the word. We couldn't be more grateful, thank you- thank you- thank you

Locations for Opportunities: Nearly All 50 states!

If there is a state you are interested in, we're more than happy to discuss that with you!
